

# Soft Care™

## Foam Soap - A unique combination of luxury and economy

Soft Care Foam Soap Delivers:

- Increased consumer satisfaction
- Simplicity
- Economy

### Increased consumer satisfaction

The rich creamy lather generated by Soft Care Foam Soap leaves customers feeling that they have used a luxury product. Foam is perceived by users as being softer and gentler on their skin.

### Simplicity

Soft Care Foam Soap saves time and effort. The colour coded cartridges can be changed in seconds and the dispenser is easy to install. As there are no drips, clogging or potential dirt traps, it is easy to keep clean. A window in the dispenser makes it simple to see how much is left. The cartridge delivers more than twice the number of doses compared to conventional soap systems. This means that they need changing less frequently.

*SoftCare Foam dispenser*

### Economy

Whilst the foam gives the end-user a rich creamy lather the actual volume of soap dispensed is 0.4ml. This is significantly lower than conventional liquid systems and even other spray and foam soaps. This means that actual cost in use is very low whilst hand washing performance is not compromised.

# A unique combination of luxury and economy

## Robust stylish dispenser

Moulded in polypropylene the dispenser is strong, easy to keep clean, impact resistant and will not corrode.

The large, colour differentiated, lever promotes ease of use.

A transparent panel in the front of the dispenser enables the user to view the level of the contents.

Easily fitted to any surface, either with integral self-adhesive pads or with the screws provided.

Concealed locking system ensures that the cartridge is protected without the risk of lost keys.

Available Pack Size:

Foam Soap, 6 x 700ml, (7514368)

Anti-bac Foam Soap, 6 x 700ml, (7514369)

Foam Soap Dispenser, single, (7514297)

## Product Choice

For general hand washing the standard Foam Soap is ideal. The product contains mild cleaning ingredients, a pleasant perfume and skin neutral pH.

Where a higher level of hygienic hand washing is appropriate a product containing an anti-bacterial agent is available.

## Cartridge and pump system

The hermetically sealed pouch ensures that the product cannot be contaminated by hand or airborne bacteria.

A foam pump is provided with each refill ensuring the delivery of high quality foam every time.

When empty the cartridge can easily be recycled.

Each cartridge contains 700ml, enough for 1750 shots.
